

22nd September 2023

# ***Resonating students with music***

8.00 am – 12.00 pm

SK Methodist Malim Nawar

A group of 12 FBF staff and 6 students visited the school which coincidentally it's the school's annual event "Program Anaku Sayang".

The speaker of the FBF staff had delivered a talk titled 'Importance of Music in Coping Mental Health'

Following that, Project Organizer handled over the musical instruments (bought by our team) along with UTAR souvenirs to the School Headmistress. As part of our engagement with the school community, the UTAR team set up an informational booth. This booth served as a platform for an interactive session with both students and parents, facilitating discussions on UTAR's academic programs and opportunities. They took this opportunity to introduce and promote UTAR's diverse range of programs, fostering a deeper connection with the school community. Lecturers and UTAR students were privileged to try Kompang, guided by the skilled Kompang school team.

They had the following interactive activities during the event:

- They opened up the promotional booth. On a rotation basis, staff explained the programs offered by UTAR (Faculty of Business and Finance) to the parents and staff who visited the booth.
- They distributed the UTAR pamphlets to all the visitors of the event.
- All UTAR staff and students had the opportunity to play the Kompang (musical instrument) as guided by the school's students.
- School students did a musical show/ performance at the end of the event.
- A few staff bought T-shirts sold by the school's students

Overall, this event was an excellent platform to promote UTAR goodwill within the community.
